

Why order through us today?

We have partnered with various labs across the country to offer our services at a REDUCED RATE and pass that low rate onto you. We also have providers across the country who work with us to allow you this convenience. When you place an order, you will receive two emails within 24 hours. The second email will give you specific instructions and links to LabCorp where you can then schedule your blood collection at your convenience, as well as instruction on how to login and obtain your results, usually within 1 to 3 days after blood collection. You will also receive links to schedule call(s) with our provider(s) if elected.
